**Humidity and Temperature Sensor
for Building Automation**

EE160

Humidity and Temperature Sensor for Building Automation

The EE160 is optimized for cost effective, accurate measurement of relative humidity (RH) and temperature (T) in building automation.

Reliable

Best long-term stability even in polluted or aggressive environment is ensured by the encapsulated measurement electronics inside the probe and E+E proprietary coating of the sensing element.

Versatile

The measured data is available on two voltage or current (2-wire) outputs, or on the RS485 interface with BACnet MS/TP or Modbus RTU protocol. Additionally, the EE160 features a passive T output.

Functional Design

EE160 is available for wall or duct mount. The IP65/NEMA 4X enclosure minimizes installation costs and provides outstanding protection against contamination and condensation.

Comfortable Configuration and Adjustment

With an optional configuration adapter and the free EE-PCS Product Configuration Software, the user can set the RS485 interface parameters, the output scaling and perform one or two point adjustment for RH and T.

EE160 for wall mounting

EE160 for duct mounting

Features

BACnet is a registered trademark of ASHRAE. ASHRAE does not endorse, approve or test products for compliance with ASHRAE standards. Compliance of listed products to the requirements of ASHRAE Standard 135 is the responsibility of BACnet International (BI). BTL is a registered trademark of BI.

Appropriate for US mounting requirements

- Knockout for 1/2" conduit fitting

External mounting holes

- Easy and fast mounting with closed cover
- Electronics protected against construction site pollution

Electronics on the backside of the board

- Optimum protection against mechanical damage during installation

IP65/NEMA 4X Enclosure

Bayonet screws

- Open/close with a 1/4 rotation

Encapsulated electronics

- Protected against condensation
- Rugged construction

E+E humidity sensing element

- Very robust
- Protected sensor surface and solder pads
- Tested according to automotive standard AEC-Q200

Inspection certificate

According to DIN EN 10204-3.1

Features

Protective Sensor Coating

The E+E proprietary sensor coating is a protective layer applied to the active surface of the sensing element. The coating substantially extends sensor lifetime and ensures optimal measurement performance in corrosive environment (salts, off-shore applications). Additionally, it improves the sensors' long term stability in dusty, dirty or oily applications by preventing stray impedance caused by deposits on the active sensor surface.

Sensing head with sensor coating and underfiller

Dimensions

Values in mm (inch)

Type T1 wall mount

Type T2 duct mount

Mounting flange

in the scope of supply for type T2

Technical Data

Measurands

Relative Humidity (RH)

Measuring range	0...100 %RH, non-condensing
Accuracy ¹⁾ (incl. hysteresis, non-linearity and repeatability)	±2.5 %RH
Temperature dependency, typ.	±0.03 %RH / °C

1) Traceable to international standards, administrated by NIST, PTB, BEV,...

The accuracy statement includes the uncertainty of the factory calibration with an enhancement factor k=2 (2-times standard deviation). The accuracy was calculated in accordance with EA-4/02 and with regard to GUM (Guide to the Expression of Uncertainty in Measurement).

Temperature (T)

Measuring range	-40...+60 °C (-40...+140 °F)
Accuracy @ 20 °C	±0.3 °C (±0.54 °F)

Outputs

Analogue

RH: 0...100 %, T: see ordering guide	4 - 20 mA (2-wire) 0 - 10 V	$R_L \leq 500 \Omega$ $0 \text{ mA} < I_L < 1 \text{ mA}$	$R_L = \text{load resistance}$ $I_L = \text{load current}$
--------------------------------------	--------------------------------	--	---

1) With Model M8 only / T sensor. Details see www.epluse.com/R-T_Characteristics.

2) Can not be changed with EE-PCS.

3) Modbus map and configuration guide see user manual or Modbus application note at www.epluse.com/ee160.

4) Product Implementation Conformance Statement (PICS) available at www.epluse.com/ee160.

5) For BACnet MS/TP only.

Order Example

EE160-M8T1A6TP1SBL-10SBH50

Feature	Code	Description
Model	M8	RH + T + T passive
Type	T1	Wall mount
Output	A6	4 - 20 mA
T sensor passive	TP1	Pt100 DIN A
Filter	No code	Membrane
Relative humidity	No code	0...100 %RH
Temperature	No code	T [°C]
Scale T low	SBL-10	-10 °C
Scale T high	SBH50	+50 °C

Order Example

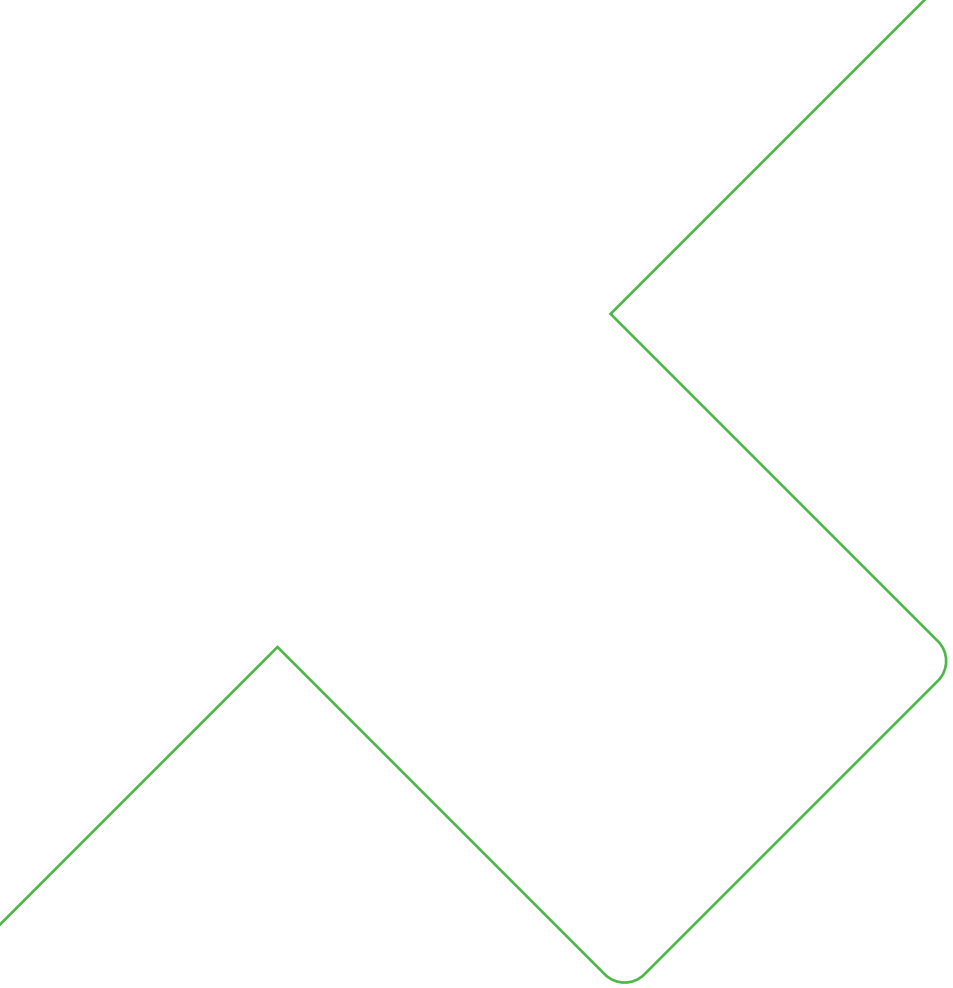

EE160-M1T2J3P1BD5U2

Feature	Code	Description
Model	M1	RH + T
Type	T2	Duct mount
Output	J3	RS485
Filter	No code	Membrane
Protocol	P1	Modbus RTU
Baud rate	BD5	9600
Units	U2	Non-metric

Accessories

For further information see datasheet [Accessories](#).

Accessories	Code
Product configuration software	EE-PCS (free download: www.epluse.com/configurator)
Power supply adapter	V03
Protection cap for Ø12 mm probe	HA010783
USB configuration adapter for EE160-M1TxJ3 (RS485)	HA011066
Product configuration adapter for EE160-MxTxAx (analogue output)	See datasheet EE-PCA
